

WTB - Engine for 1986 944 n/a

Posted by Jump07 - 04 Jun 2008 05:35

I am looking for a motor for my '86 944 n/a...in the \$200-500 range...maybe more. I can pick up if you're in Northern or Central Cali.

I forgot to ask if this was a RUNNING engine . I'm looking for a running engine I can put in Tims's car while he saves to rebuild his.

I have decided to buy the motor for his asking price of \$350 since it comes with quite a few parts that I was planning on purchasing seperately. I am thinking I will slowly work on it and get it ready to switch with my motor from my race car and then sell that motor for maybe around \$200 in the Fall or Winter. I can't stand the oil leaks from my current engine.

The motor that Shawn is selling is an early motor. I am looking for one for my '86.

Sid - Shawn is going to deliver the axles with your other stuff. I'll get them from you sometime....
