

Trying to come back racing for 2016.

Posted by Flash944 - 11 Dec 2015 21:24

I'm planning on coming back to racing. I've been out for some time and need to know if the cars have changed from 3 to 4 years ago? Thanks to Jim and all of his YouTube videos I've been watching you guys and I have to say everyone has gotten really fast!!! Any input will help thanks and hopefully see you all next year.

Hey Flash

Welcome back. Glad you enjoy videos.

Dyno Test compliance to make sure 3 pulls ave TG and HP is under 140.

No Chips, headers, or porting/heads. You can still shave non 88 heads some.

Running Toyo RR's now which are a couple seconds faster but about 30% shorter life than RA's.

You also need a Hans/defender or such SFI 38 type neck restraint. Must be recertified after 5 years old (one time)

for 2016 need SA 2010 or 2015 helmet.

Chuckwalla AZ crossover in Feb!

Thanks Jim this is Rafi. I'll try to make the Feb event just need to get the car ready, and need all the safety equipment updated.
