

Clutch recommendations

Posted by code3pro - 16 May 2016 19:53

Hi everyone. It was great seeing all of you this weekend even with wallapalooza on Saturday and Clutchaggedon on Sunday. Speaking of which, diagnosis confirmed clutch stuck open so looks like it will need to be pulled next week. The offending unit is a Centerforce. Anybody have thoughts and recommendations on specific parts that have or are working well?
