

WTB 944 SPEC Project Car - Northeast

Posted by banana944 - 04 Dec 2013 10:00

Looking for a winter project, was originally looking for another 951 to build but am considering venturing into the spec world. Looking for a car to build and to get my feet wet in the racing world.

What I am looking for is a 944 Spec project car. I am ideally looking for a car that is already stripped and caged with hopefully some suspension work already taken care of. Motor and trans, condition does not matter, and I don't care if the car is ugly.

Anything like that in the Northeast region?

Thanks,

Will

Actually already picked up a car!

Thanks for the interest however.

I would like to bump this thread up again. I bought a car, life didn't work out the way I planned (does it ever?), and I sold it off.

Criteria is the same, please feel free to e-mail me as well at
