great spec racer candidate (Denver CO) Posted by 931Pilot - 20 Jun 2015 22:46

I have an 84 NA for sale.

It has had a decent amount of work done to it.

Manual steering rack

manual sunroof

AC delete

Engine/head has been rebuilt, with low miles since.

83 forged rods

88 pistons (higher compression)

shaved head

- late tube headers
- Fidanza Aluminum flywheel
- 944 turbo Oil cooler.
- throttle cam.

Fresh Oil

Suspension:

Koni yellow sport front and rear, with m030 front springs (stiffest that was on NA with factory option, to stay "stock" legal)

944 turbo sway bars

m030 torsion bars (25.5mm) I think!

15x7 3 piece enkei wheels, On Khumo DOT slicks.

Perforamnce Friction track pads/Braided brake lines.

Really the only thing it needs is paint, its guards Red, and primer...

\$2200

Possibly a set of cookie cutters for sale seperately
