

SOLD!!Blind Apex in car lap timer

Posted by cbuzzetti - 11 Aug 2011 16:04

Used Blind Apex Displayit (HUD-9X) comes with instruction and set up pages. Uses the AMB transponder system in your car and the track system to give you the following information. Good working condition.

DisplayIT - HUD9X34

The original lap timer that works with your transponder to provide accurate lap times directly from the main timing system. No beacon to setup.

Information: Lap time, gap with best time (with + or - sign), total laps, track time

current position (overall sorted by best lap time), gap between best time and best time of vehicle 1 position faster

Lap stored: 34 last lap

Power: Direct from vehicle (no battery to change or recharge)

Trigger: Wireless signal from timing system

Typical users: Pro, semi-pro and club racers that mostly race while an electronic timing system is being used.

Know what your lead competitors are doing while on track with you.

Asking \$150 OBO list price is \$299
