Anyone have another one?

Thanks!

thanks for the response. I left a message at the # you left. just need a few details. I'm putting in in an 87 924S with an 88 trive train.

wondering about condition, what it came out of or code, where you are etc and price you're asking?

Obviously everyone wants one...is there an aftermarket solution to this?

I understand there to be a couple of aftermarket solutions. Kits are available from Guards but are pricey. Something else available is a Quaife (sp?). any comments from those with experience with either of these solutions?
