

WTB: Short 5th Gear set

Posted by FDJeremy - 11 Nov 2013 16:26

Hey guys, I grenaded my clutch during qualifying this Sunday and I will be replacing the rubber centered clutch with a new solid sprung hub piece. Since I will be dropping the transmission and torque tube to achieve this, I wanted to install the short fifth while everything is out of the car. The problem is that my internet searches have come up short and I'm not entirely sure what I need to complete the conversion.

Does anyone have a short 5th gear set they are willing to part with or know of somewhere I might procure such a thing?

I've heard bad things about cogscogs.com from a fellow racer and wanted to pursue other avenues. Any help would be greatly appreciated.

Thanks,

Jeremy
