---

Used but in great working condition. This is the larger MXL line of displays. Includes lap timer, oil temp sensor, water temp sensor, oil pressure sensor, fuel pressure sensor, (2) EGT sensors, wheel speed sensor, extension cables for most sensors, down load cable.

I do not have the beacon or instruction manual.

Here is the page at Aim Sports for this unit.

[www.aimsports.com/products/mxl-strada/index.html](http://www.aimsports.com/products/mxl-strada/index.html)

Note this unit does not have the data logger or G meter. It is just the digital dash.

It will however record all your lap times, show all your engine vitals and provide preset warning lights for engine stats like temps and programmable shift lights.

Way cheaper than buying separate gauges with warning lights when you remove the stack dash.

\$1,000 OBO. the sensors alone cost about \$500.

Charlie Buzzetti 805-286-1732 or cb at fibertools dot com for pics.

I can deliver to Buttonwillow at the NASA November race or can ship today.
