

Who needs rain tires for the Championships?

Posted by Sterling Doc - 29 Oct 2014 04:53

Guys, it seems the RA-1 is on National back order right now due to dock strikes/issues.

NASA is working on getting a few sets to the Championships for us, but needs to know how many need rain tires.

If it rains I will need some.

Thanks for sorting this out for us Eric.

I have an emergency set I could offer up to those that may need. They have been used twice this season in the rain, but should work in a pinch if needed. Shipping might suck tho.
