

Announcing the new 944 Spec National Director!

Posted by Sterling Doc - 22 Oct 2015 17:36

New 944 Spec National Director

After almost exactly 5 years as the 944 Spec Series director, it is time to step aside for someone with a fresh fire in their belly. While I continue love the class, the racers, and what it stands for, my time is more limited by family and medical practice needs, and I have decided to step down rather than proceed on cruise control. There is no drama prompting this, it is just time. I want more for the class than I can give at this point. I will still be around to support things, and put my 2 cents in, though!

I'd like to thank all of you that I met, online, and in person. 944 Spec attracts the best group of racers throughout the country, bar none, and I have thoroughly enjoyed getting to know you guys. Many great stories from over the years, from many places.

[Drumroll]

Announcing Dan Piña as the new 944 Spec National Director!

Dan has been a member of NASA for 12 years, starting with driving the Inaugural 25 hours of Thunderhill. Since moving to the Midwest, Dan has raced with 944 Spec for the last 4 years, and is the current East Coast & Midwest Champion. Dan is the consummate budget racer, yet always has the cleanest car in the paddock. Dan's legendary car control skills are exceeded only by his fun-loving nature in the paddock and off the track. Dan has raced successfully all over the country, and with several organizations, before finding a home with NASA. Dan will bring much needed online/social media/tech savvy onboard to help grow the class, and has a great passion for the ideals of 944 Spec.

I will let Dan take it from here!
