

mookeeh camber plates

Posted by sealboy - 20 Feb 2009 04:29

I got some for my 1988 944S....anyone with experience please tell me if they are good or not.

I've heard they will raise the front of my car.

Huh?

Thanks!

How did it go with the install? I have these with the Koni kit from Paragon. Car is great now but when i come to a stop i get a clunk. I can make it worse when i go forward and backwards fast. Everything seems tight up front but it has me worried. Ideas??
