

Help - Scratches on cylinders?

Posted by Omnid0n - 16 Mar 2009 03:54

Hi,

So we taken apart the motor and found some scratches
on the cylinders. What can I do?

Help

Sid

Sid,

Bummer, that's pretty rare, and the valves, too. Your car may not have have it's oil changes followed well.

I talked to Nick at Bennington this morning. He has what you need. Click on the Bennington Motorsports logo on the left to get his info, and give him a call.

Sid,

My block seemed to have the same scratches. Have the machine shop hone the block. The scratches will go away but other wear will show up. I've posted pictures in this forum.

HTH,

Karl
