

## Looking for 2.5" cone shaped spring hats

Posted by cbuzzetti - 18 Aug 2009 08:58

---

Hi Guys, I am looking for a 2.5" cone shaped spring hat for the front suspension of my Spec car. I bought Wrightwood racing camber plates that have about a 1.15" taller height than flat camber plates.

Unfortunately WR does not make the spring hat for this shock.

Any ideas?

Thanks in advance.

Would something like this work?

[www.paragon-products.com/product\\_p/mc-7510.htm](http://www.paragon-products.com/product_p/mc-7510.htm)

They need to be about 2" tall. I originally ordered those and they won't work. Too short.

Thanks for helping.

D'oh - OK, it was worth a shot.

Maybe try calling TrueChoice, as they do a lot of custom suspension work and might have something sitting on the shelf that they use for this exact purpose.

Good luck!
