| Wiring Diagrams (specifically Fuses and Fuel Pump) Posted by Salanis42 - 06 Feb 2010 11:47 |
|--|
| Took the car out to the track again to get used to it. This time, it lasted 2 laps and stopped running. Appears to be a fuel pump issue, and looks like the pump just isn't getting power, so I'm thinking loose wiring. |
| Can anybody direct me to some decent wiring diagrams? I'd particularly like a decent one for the fuse boxes, so I can know what lines are supposed to be what. |
| Thanks. |

| l emailed you a shop manual file for 944's. Don't know how it will translate to 924S and it's a big file so trash it if you don't need it. |
