

Ignition Wires

Posted by Salanis42 - 24 Jun 2010 12:29

What the heck is with the cost of ignition wires for the 944? Is there a cheaper alternative to the \$100 sets being sold?

Magnecor makes a set for much cheaper. I just got a set of these. Don't forget to use the 12% 944 spec discount.

The cost is in the Beru fittings on the ends. These can be reused if you unscrew the ends and crimp on new screw ends. Then you reuse the old beru fitting. I make my own plug wires like this.
