

Window Net Request

Posted by seafeye - 20 Nov 2011 18:10

As the title suggests...

I am looking for different ways to mount the driver window net.

There is a used Nascar parts place near my house so i have access to various nets and attachments. Just no cars here to take a look at.

Pls show me what you have.....

This is just one that I bought from Apex Performance, vender on the left. Quick release mount welded to roll cage.

Front bottom. I looped some strapping material so that It could move about some.

Rear bottom. I did the same thing here.

For the rear top mount I used one of the holes in the B pillar tie in bracket.

I bent the rod to fit and tried it several times.

my upper net rod is bent like above- i bought the IOport net w/ the long straps coming off the bottom to tie to the door bars. Works great!

I think the I/O Port with the straps is the best choice on the market. I used a Coleman Racing spring loaded top bar so I didn't have the problem of the seat belt male on the roll bar penetrating my body every time I try to get in and out of the car.

The upper mounting bar and tabs can be seen here.

Did you end up getting the 4 strap or 5 strap version? Trying to figure out if the 5 strap one (18x24) is the best fit for these cars. The 4 strap is 15x18.

Thanks

-Curt
