Seat installation w/ ripped out bolt damage Posted by Jump07 - 30 May 2008 06:19
This morning one of the bolts holding down the front of my seat ripped right through the floorpan. Has this happened to anyone else?
I am hoping that it is repairable with welding another threaded bit on?
I am thinking this would be a good time to install my Kirkey seat. Has anyone welded their brackets directly to the floor?
What are my options here?
Thanks,
Jeremy

sorry I'm blowing it on getting the file to show up at a good size. I'll try again later
