

50-50 paint job

Posted by Kurt R - 01 Jun 2021 15:30

I want to repaint the roof of my car.

Race car standard is "Looks good 50 feet away when the car is traveling at least 50mph", add in "50 minutes after sundown" if required.

Right now the car is LY7U Stone Gray Metallic, or something close, as the paint under the CDOC sticker I peeled off is not the same as the rest of the car. A layer of paint came off with the sticker.

Anyone aware of something close, or an inexpensive source of paint the right color? Anything from Summit Racing?

I'd like to avoid painting the whole car even though there's a lot of rock chips on the front.

I'm doing my best to generate forum content.
