Stock air boxes available here Posted by tcomeau - 11 Jan 2017 13:21

I have tops, bottoms, side screws, front brackets, etc. Make sure you support the air box with a front bracket so the AFM doesn't stress your rubber J-boot. Early cars have a different bracket than late. 1985.1 or 2 is the split. Let me know what you need. Shipping from San Diego.
